

## Emergency Response Bin – ERB2000

### LEGENDARY QUALITY

#### **Hazardous Waste, Natural Disasters, Medical Spills and Clean-Ups**

The Emergency Response Bin (ERB) is designed to show all Local Enforcement Agencies including visits from OSHA, AQMD, Fire Authorities, and Insurance Representatives the preparedness of your facility or remote on site operation to respond to emergency needs all within a moment's notice.

Response time and appropriate equipment during the course of an emergency is the key to your response success and reflects positively as to your public, environmental and personnel safety concerns.

The ERB-2000 unit is the workhorse unit. Like ERB 1000, it can be used as a stationary or a prepared ready to go unit that can be immediately loaded, via scout or flatbed, and taken to any remote location in response to any on site emergency, accident or spill. This unit can be either painted or powder coated to your specifications. Some have decided to duplicate their company colors in order to respond without drawing attention. Just like the ERB 1000, it can be outfitted with a variety of emergency equipment specific to your response needs. Having this unit on site during the course of an emergency reflects positively on your public and LEA appearance and can reduce your liability exposure.

## Emergency Response Containers

### LEGENDARY QUALITY

#### Hazardous Waste, Natural Disasters, Medical Spills and Clean-Ups

For a quick response time you must have a well thought-out, prepared strategic plan in place. **ConFab's ERB is the solution!**

- 10 GA bottom, 12 GA sides and 14 GA back.
- 7 GA channels (end loader).
- 11 GA bottom fork channels.
- 1"x 3" Tube reinforced top perimeter.
- Drain plug conveniently located for cleanout.
- Floor sump with in seam weld to handle spill materials with proper secondary containment.
- Gas piston spring-assisted lids to make opening and closing easy and convenient.
- Tractor spring assisted ramp with reinforced tube frame and safety grip.
- Stainless steel hardware to eliminate rust.
- Special poly-on steel casters.
- Chrome oversized handles make it easy to move.
- Custom-built side cabinets available with and without shelves for storage.
- Floor mat to keep spilled material from tracking outside.
